Hybrid Global Connectivity

- One global network to interconnect all your remotes sites, one partner to handle all your local connections and the networking:
- Fast pricing
- Expeditious delivery
- Seamless 7x24 Network & Security Management, Operation & Support
- Ideal for organizations with multiple offices & sites distributed over many countries.

Required disponibility*

- Best effort - no specified SLA
- Uptime 98.90% (8 hours service restoration time) - 2 diversified access solutions
- Uptime 99.50% (4 hours service restoration time) - 2 premium diversified access solutions
- Uptime 99.90% (1 hour service restoration time) - 3 premium diversified access solutions

Overlay site-to-site Connectivity*

- Swiss Managed Networking & Security
- Each appliance can handle at least 3 underlay accesses to mitigate any degradation on a local access, automatic switching with no customer impact in case of link cut, packet loss, jitter increase.

Underlay Accesses*

- Use Connectivity solutions provided by SGC, Fixed (Fiber, Copper) or Mobile (3G/4G/5G, Microwave) or Satellite (GEO, MEO, LEO)
- Or continue to use your own connections (Bring Your Own Connection)
